Final-year Information Technology Engineering student at the Royal University of Phnom Penh with hands-on experience building and deploying full-stack web and Android applications using Laravel, Kotlin, MySQL, and REST APIs. Seeking a Software Engineering Internship to contribute to production-quality software while continuing to grow as a full-stack developer.

Volunteer

Cambodia Book Fair (2023 & 2024) & National Reading Day (2024) 2023 – 2024
Logistics Team

- Assisted with procurement, inventory management, and distribution of event supplies.
- Coordinated logistics with organizers and volunteers to support event operations.

International Conference of Asian Political Parties (ICAPP) November 2024
Liaison Officer

- Assisted international delegates with communication, coordination, and logistical support.
- Collaborated with organizers and volunteers to ensure smooth conference operations.

4th National Ju-Jitsu Championship March 2026
IT Team

- Configured and operated the digital scoreboard and managed match data using Smoothcomp.
- Assisted with live streaming and provided technical support during the competition.

Projects

Campus Found
Full-stack campus lost-and-found platform designed to replace unstructured Telegram reporting on campus.

- Developed with Laravel, PHP, MySQL, Bootstrap, and REST APIs.
- Implemented authentication, ownership claims, role-based administration, and responsive interfaces.
- Deployed on Ubuntu using Nginx, PHP-FPM, and DigitalOcean.

Campus Found - Android
Native Android application extending the Campus Found platform for mobile users.

- Built using Kotlin, MVVM, Hilt, Retrofit, Room, and Material 3.
- Implemented authentication, lost-and-found reporting, search, filtering, and offline data caching.
- Applied modern Android architecture to deliver a responsive and user-friendly experience.

DearYou
Private digital letter platform for creating personalized letters with secure sharing and rich media.

- Engineered using Laravel, PHP, MySQL, Blade, and REST APIs.
- Built private sharing, recipient interactions, media uploads, and administrative tools.
- Deployed on Ubuntu using Nginx, PHP-FPM, and DigitalOcean.
